DWA_04.3 Knowledge Check_DWA4

_____

1. Select three rules from the Airbnb Style Guide that you find **useful** and explain why.

- References, it teaches me that I should not use var but const when referencing so that I can not reassign my references to avoid bugs. If I want to reassign references I must use let instead of var as it is a block-scope rather than a function-scope.
- I must use the literal syntax for array creation which is [ ] instead of parenthesis.
- Strings that cause the line to go over 100 characters should not be written across multiple lines using concatenation because broken are painful to work with and make code less searchable.

_____

2. Select three rules from the Airbnb Style Guide that you find **confusing** and explain why.

- The use of single quotes instead of double quotes in strings because i was taught that they all work as one thing so now why is the double quotes bad.
- Object shorthand method, why is the one with a function bad to use?
- Array spreads (...) how do spread copy arrays
